Venue: Nessun Dorma Club, 11th Floor, Skyfortune Boutique Hotel
358 Hongxu Road, Shanghai

Contact: Boya Shen, 13526887328

Email: enquiry@ssea-online.com

Is the renewable energy sector able to defy the raging economic crisis and maintain its phenomenal growth? The impact of China's pursuit of "energy saving and emission reduction" is beginning to be felt in the policy making, what challenges and opportunities will it bring to China's renewable energy industry? And finally, what are the key obstacles in cross-border energy technology transfer?

These issues are the central theme of the SSEA's upcoming half-day mini-fourm in Shanghai, connecting policy makers with investors and leaders of the renewable energy industry. There will also be a presentation on business opportunitis with British and European firms, as well as keynote speeches delivered by experts of the industry.

Organized by:

Sino Sustainable Energy Association

The SSEA is an independent, nonprofit organization dedicated to promoting the use of sustainable energy in China and beyond. Founded in 2006 by a group of Chinese professionals in the UK, it serves as an information hub, a consultant on energy-related projects and strives to builds a platform for collaboration between stakeholders, clean energy innovators and environmentally-conscious businesses.

Currently, the SSEA is working on a partnership with the International Centre for Trade and Sustainable Development (ICTSD) to hold a conference on "China and Global Sustainable Recovery" in Geneva in September 2009.
